HYBRID SWEET CORN

SWEET CORN

TANGO

TANGO is a mid early season high-yielding hybrid sweet corn. Its strong plant is resistant to lodging and sets one to three cobs. Each cob averages 20-23cm in length. This variety is suitable for freezing, canning and fresh consumption.

Variety	Maturity	Plant	Fruit Size	Disease Resistance/Tolerance	Characteristic
Tango F1	80-85 days	220 cm	20-23 cm		Suitable for freezing, canning and fresh market

RESISTANCE *is defined as the ability of a plant variety to highly restrict the activities of a specific pathogen or insect pest and/or restrict the symptoms and signs of a disease when compared to susceptible varieties.* **TOLERANCE** *is defined as the ability of the plant to endure or recover from damage caused by adverse environmental stresses. Varieties where specific races or strains of pathogens are not indicated, the variety is known to be resistant to some but not necessarily all known races or strains.* **GUIDE TO RESISTANCE:** *A-Anthracnose (Colletotrichum graminicola); CCR-Common Corn Rust (Puccinia sorghi); CS-Common Smut (Ustilago maydis); HS-Head Smut (Sphacelotheca remana); MDMV-Maize Dwarf Mosaic Virus (Strain A-B); MMV-Maize Mosaic Virus (Race 1); NCLB-Northern Corn Leaf Blight (Exserohilum turcicum); SBW-Stewart's Bacterial Wilt (Pantoea stewartii subsp.stewartii); SCLB-Southern Corn Leaf Blight (Bipolaris maydis); SR-Southern Rust (Puccinia polysora).*
