

Cucumbers: Yamama

Extremely prolific plant with high number of side shoots. The high quality fruits are ribbed, 16 cm long, with nice green color. Its high tolerance to viral infections is a main characteristic of this variety.

Suitable for round year cultivation.

US Agriseeds™

Characteristics	Extremely prolific, with high yield
Days to Maturity	38
Disease Resistance / Tolerance	CMV, MMV, WMV,
Plant	Very Vigorous
Product Type	Cucumbers
Region	Middle East
Shape	Cylindrical
Size	16*2 cm
